Small Fruits for the People.

use, as well as similar lists of raspberries, grapes, etc. The task becomes more difficult, however, the more we become restricted in the number of va-

There is a large class of farmers and cottagers who have never enjoyed the luxury of feasting on home-grown berries fresh from the vines; the far off pioneer, who has just cleared a few acres of virgin forest, striving to make a home and garden out of a wilderness. All these and many others of limited means can not yenture to invest much money in a select list of choice varieties, to experiment and learn in after years which kinds are best suited for their special climate and soil. They wish to know how, with the smallest possible outlay, they can procure enough plants for the commencing of a fruit garden, of such varieties as are most likely to succeed everywhere. Although no one variety succeeds equally well everywhere, yet some partake more of a cosmopolitan character than others; and limited to one single variety of each class, the following ones can be depended upon with most certainty:

Strawberries - Charles Downing, Sharpless, Longfellow, Warren, Cumberland Triumph Red raspberries-Cuthbert and Tur-

Black raspberries-Kentucky Mam-Blackberries-Kittatinny and Snyder.

Currants-Versailles. Gooseberries-Houghton.

Grapes-Concord, Delaware, Elvira All of these are, if not of the best, of above average quality, hardy, prolific and of easy culture. A number of plants, sufficient for a beginning, may be obtained from any nursery-man at very small cost, and delivered, without further expense, at the post-office of the remotest settler. No investment at the founding of a new home can bear better interest than a few dollars judiciously spent in the planting of a fruit garden.

Wash for Fruit Trees. A correspondent of the Fruit Recorder writes as follows :

of recipes for coddling moth. I have tried various remedies on my orchard, Sure, Pleasant, Safe, some of which have been suggested by experience with them.

"My orchard consists of trees ranging from one to fift; years of age, and I find Pleasant Substitute for the coddling moth ready for attack at any age. Last year, when pruning, I made a wash of my own, and tried it with good results. The following ingredients compose the wash: One quart of For Sale by Druggists. lime, such as is used by the plasterer's in 'white-coating,' one peck of leached wood ashes, two pecks of cow manure. one quart of soft soap, and one large tablespoonful paris-green. I wet the mixture thoroughly to make it like paste, beating it thoroughly until it became tough. I added twelve quarts of water, or enough to give the trees a thorough coating. I find, on the trees so washed, that the bark is dropping off astres, Jackson, Miss. and leaving the new bark perfectly june16, 82-5m. smooth. On all the trees I have washed BEN. HARDAWAY. I see a perfect improvement."

Sheep Raising in South Mississippi.

Natchez Democrat.] Among the progressive industries of Mississippi, the returns of which will probably startle our Northern brethren when the census of 1890 is taken, will probably be the breeding of improved ep. Already the attention of Mississippians on the seacoast is being largely directed to this pleasant and profitable branch of farming. A correspondent of the New Orleans Picayune is enthusiastic over the prospects of two gentlemen, who have established a large sheep farm near Ocean Springs, in Southern Mississippi. One of these gentlemen Mr. W. R. Snyder, has had long experience in sheap breeding in Western Virginia, and has removed to Southern Misslanippi as the best sheep raising country in the Union.

The Cotton Worm.

HOW TO GET RID OF THE PEST-EFFORTS OF THE ENTOMOLOGICAL COMMISSION.

The annual report of the Entomological Commission has been submitted to the Secretary of the Interior. The cotton worm branch of the investiga-tion as conducted by Prof. Riley, was quite extensive. His assistants were as humanity, I have concluded to write sippi, Alabama, Georgia, Florida and you concerning a matter, not only of other cotton growing States, and es a large and carefully selected stock of general, but important interest. Several pecial attention was paid to those pormonths since, in Harrison, our adjoining tions of Louisiana and Mississippi which

Ague Cure

Is a purely vegetable bitter and powerful tonic, and is warranted a speedy and certain cure for Fever and Ague, Chills and Fever, Intermittent or Chill Fever, Bemittent Fever, Dumb Ague, Periodical or Bilious Fever, and all malarial disorders. In miasmatic districts, the rapid pulse, coated tongue, thirst, lassitude, loss of appetite, pain in the back and loius, and coldness of the spine and extremities, are only premonitions of severer symptoms, which terminate in the ague paroxysm, succeeded by high fever and profuse perspiration.

It is a startling fact, that quinine, arse-

and profuse perspiration.

It is a startling fact, that quinine, arsenio and other poisonous minerals, form the basis of most of the "Fever and Ague Preparations," "Specifics," "Syrups," and "Tonics," in the market. The preparations made from these mineral poisons, aithough they are palatable, and may break the chill, do not cure, but leave the malarial and their own drug poison in the system, producing quiaism, dizziness, ringing in the ears, headache, vertigo, and other disorders more formidable than the disease they were intended to cure. Ayen's Acue Cure thoroughly eradicates these noxious poisons from the system, and always cures the severest cases. It contains no quinine, mineral, or any thing contains no quinine, mineral, or any thing that could injure the most delicate pa tient; and its crowning excellence, above its certainty to cure, is that it leaves the system as free from disease as before the

For Liver Complaints, Aven's Agur CURE, by direct action on the liver and biliary apparatus, drives out the poisons which produce these complaints, and stim-ulates the system to a vigorous, healthy We warrant it when taken according to
